Almos: daily we have satements like this We have to day a long article from the pen of Mr Gas on in upport of the claim made The celebrated Major Powers a man of in mense local influence in Banconibe coun v who was a trusted adviser of Linco u and Sc by the Oregonian Railway Company to the use of the city levee for terminal purposes It is ably written and contains much that m ward and w has always heretofore been a Staunct r ublican announces that in h s founded upon good reasoning. And yet the Judgmen ... e t me has come to put an ind to ma n argument is founded on an assumption sect o 4; a, ts on and therefore he declares which convenient as it is for its purpose is for Han k Major Powers finds sault with the collar assumption simply is this, that the company and the romination of General cannot get terminal grounds elsewhere and Hancoc, offers him the opportunity he has must have this leves or abandon its enter long wante: Of course it is needless to say prime. Now if it comes to this we are decid that the versat is and deserving major has stry in favor of giving up the leves at once shimself been of the cast of sadly negligible.

But surely no such situation axists. It seems ones Or we are informed with a great deal of stilled electrica that 'Judge Dombey of the size informed with a great deal of stilled electrica that 'Judge Dombey of the size informed the democratic party because he finds that a sound political quite absurd to argue that there is no way for the company to get terminal grounds but by appropriation of this particular property city wants the road and the country wants it and the general interest should be economy requires him to condemn the course which that party has taken. He is a paramount o any particular interest where the two come in conflict. But here no such represents we man and the abandonment of conflict is necessary since the company may p trebase eligible termina' grounds in alm the faise gods of democracy will be a pun ming how to that offele organization, not any part of the city, or adjacent to it Even only in the city but in the entire state. The Judge seeing the tendency of things would if the mty perversely wished to stand in its own light by excluding the road it ought not consider h meelf not only dereliet in his du y to shut out the countres of Yambill Marior Polk Linn and others from the advantages but was ing in self respect if he failed to give in his a eg ance at this time to the republi the road will bring them So far the argu can party So it goes on both sides And so we have the wood flopper a word which, lovepted lexicography frowns upon origones as an addition to the verba re-sources and current publicled reporting. The ment is good. The error is in the asset flon that the road can not be built unless this leves he taken, because it is the only possible chance of getting a terminus In this of course we say nothing on the subject of the political flopper like he fish that flugs itlegal right of the company to take it. selfout of the basket is he who flouriers from the party which he has h therto be-To a committee of Germans who recently longed into the party which he has long been longed interior of the factor was ed upon him at Governor a island, Gen ' The American is make much o, these takings.
